Ref No. NIPER-G/S&P/68/AVS/2021-22 dated 12/11/2021

Dated: 16.11.2021.

Minutes of Pre-Bid meeting

With reference to the tender enquiry No: NIPER-G/S&P/68/AVS/2021-22 dated 12/11/2021 NIPER-G has invited open tender enquiry for the procurement of Supply, installation commissioning and demonstration of Audiovisual System as a Turnkey Job. The following points has been discussed during the pre-bid meeting held on 16.11.2021(2:00 PM) and the necessary changes have been made in the tender document. The prospective Bidders are here by requested to quote the bids accordingly.

Query. 1. The representative raised the query regarding static control ratio of serial number 01, 06 and 08.

Response: All the points are technically relevant. So, the authorised committee suggested to revise the static contrast ratio to 4000:1 or better for serial number 01 and 06, and for serial number 08 it may be 1200:1 or better.

Query. 2. Serial number 01 and 08, the tender document says the panel technology 'VA or equivalent' and 'IPS or equivalent', respectively.

The representative raised to include 'VA, IPS or equivalent'.

Response: The authorised committee responded that for serial number 01, the display will be exclusively for the visualization by the chairman and therefore, VA offers superior contrast ratio than IPS panel in terms of panel contrast ratio.

Hence, the authorised committee did not recommend the technical changes of specifications of serial number 01 and 06 panel technology.

On the other hand, the description IPS or equivalent given for serial number 08 looks ideal because the display will be kept in a long distance and the technology offers wide viewing angle.

Query. 3. Serial number 13, the representative wants to include 3/5-pin XLR instead of 3-pin XLR, because the 3/5-pin XLR is better for "Look at me" function as per the point mentioned in scope of the work on page 36.

Response: The authorised committee suggested revising the tender document as 3-pin XLR or better.

Query. 4. Serial number 15, the specification for transducer mentioned in the tender document is 'minimum (X16) 2.75 inch woofer or better'. The company representative requested to put 'minimum (X16/18)2.75 inch woofer or better', because he claimed that (X16) 2.75 inch woofer or better is specific to 'Yamaha'.

Response: The authorised committee suggested not to change any specification since the description of transducer given in the tender document is "minimum (X16) 2.75-Inch woofer or better".

(Department of Pharmaceuticals, Ministry of Chemicals and Fertilizers, Govt. of India)

Query. 5. For serial number 16, the query raised by the representative to include horizontal, vertical 120° for two-way surface-mounted loudspeaker.

Response: In our tender document, it is already given as "120° angle conical or better". Therefore, the authorised committee did not suggest any change in specification for serial number 16.

Query. 6. Serial number 27, digital signal processor: The company representative is of opinion that the whole description given in the tender document for serial number 27 is specific to "particular brand". He himself asked us to keep the word "off record". However, he pointed out one technical point in the description. The tender document published consisted of "It should have minimum 12 Mic/Line inputs and 12 Line outputs. The processor must include minimum 16 assignable & routable AEC channels and 16 General Purpose Inputs (GPI) X 16 General Purpose Outputs (GPO) ports." There is a discrepancy of number 12 vs 16 as per his observation.

Response: The authorised committee after reading the tender document carefully would like to point out that the first sentence of digital signal processor (serial number 27) particularly conveyed that "it should have minimum 12 Mic/Line inputs and 12 Line outputs."

Since it is the minimum requirement of the system, the supplier may go for better specification for the same.

The other terms and conditions will remain unchanged as mentioned in the tender document.
